

Medical Report

Patient Name: John Doe

Patient ID: 123456

Date of Birth: 1985-05-15

Date of Report: 2025-05-20

Summary:

The patient presented with symptoms of mild chest pain and shortness of breath. An ECG was performed, showing normal sinus rhythm. Blood tests, including troponin levels, were within normal limits. A chest X-ray showed no acute abnormalities.

Diagnosis:

- Non-cardiac chest pain (likely musculoskeletal)
- Mild anxiety

Recommendations:

- Continue current medications
- Avoid heavy lifting for the next 2 weeks
- Follow-up with primary care in 1 week
- Seek immediate care if symptoms worsen or new symptoms develop

Physician: Dr. Jane Smith
